Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 121, 124, 125, and 134 in the reply filed on 3/2/06 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 121, 124, and 125 are rejected under 35 U.S.C. 102(e) as being anticipated by Xu et al. Xu et al. disclose at least one vertically oriented carbon nanotube (110); at least one horizontal conductive layer (108), wherein the said horizontal conductive layer is electrically coupled to said vertically oriented carbon nanotube; and wherein the said horizontal conductive layer includes patterned lines (figure 6D). With regards to claim 124, the carbon nanotube is conductive (it emits electrons). With regards to claim 125 Xu et al. disclose the patterned lines consisting of copper (column 5 lines 15-25).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 121, 124, 125 and 134 are rejected under 35 U.S.C. 103(a) as being unpatentable over Choi et al. in view of Narwanker et al. Choi et al. disclose at least one vertically oriented carbon nanotube in the substrate (10); at least one horizontal conductive layer (5), wherein the said horizontal conductive layer is electrically coupled to said vertically oriented carbon nanotube; and wherein the said horizontal conductive layer includes patterned lines (figure 5b). With regards to claim 124, the carbon nanotube is conductive (it emits electrons). With regards to claim 125 Xu et al. disclose the patterned lines consisting of tungsten. Choi et al. fails to disclose patterned lines. However Narwanker et al. disclose that patterned metal lines are well known in the art (column 9 lines 25-30). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Choi et al. and Narwanker, because patterned lines (and the formation of patterned lines) are well known in the art.

Response to Arguments

Applicant's arguments with respect to claims 121, 124, 125, and 134 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
